

SOFTWARE ENGINEERING

System Integration & Development

Orogenic combines a continuum of consulting, systems integration and IT management and business process services with oil and gas expertise to help organizations create agile and cost-effective infrastructures.

GIS

Orogenic leverages on the experience and technical aptitude to integrate dynamic spatial data in a geographic context using the latest commercial solutions (ESRI, Google Earth Enterprise, Lynx Information Systems and OpenSpirit to name a few).

We design, build, and implement enterprise systems to allow analysts and decision makers to visualize business, tactical, and intelligence information over a map or digital imagery. Our knowledgeable and certified staff has a proven track record of developing and integrating custom geospatial solutions and geographic information systems (GIS) across multiple platforms and environments.

ESRI, Google Earth Enterprise, Lynx Information Systems and OpenSpirit are trademarks or registered trademarks of their respective owners.
